

Ultimate Mobility

THE TECHNOLOGY GUIDE FOR PEOPLE ON THE MOVE

ELECTRONICALLY REPRINTED FROM LAPTOP Magazine's Special Issue, Ultimate Mobility, Special Issue #81

SOFTWARE

Remote Access Software

Find the right program to free your files.

by Steve Smith

GoToMyPC

Some things do get better with age. This Web-based remote-access program with full 24-bit color support links you right into your host PC. GoToMyPC

works with most versions of Windows, but Mac and Linux are compatible only for accessing your host Windows PC. Guests can temporarily share your PC, and you can sync and transfer files with an intuitive drag-and-drop maneuver. Pricy but as feature-rich and reliable as they come, GoToMyPC also offers remote access for Windows Mobile PDAs and phones, letting you access e-mail, files, and applications.

\$19.95 per month, \$179 annually;
