Introducing GoToMyPC Corporate 6.0

Along with proven security features, the newest version of GoToMyPC® Corporate delivers increased functionality and ease of use for both end users and IT administrators. GoToMyPC Corporate 6.0 makes remote access faster, more convenient and more useful than ever before.

Here are a few of the new and improved features in 6.0:

Remote Sound: Now you can hear your PC as well as see it. GoToMyPC allows you to hear any sound on your remote computer for a complete remote-access experience. Use it to hear system sounds, voice mail, recordings, music or any other sound on the host PC.

Remote Printing: Printing from the host PC to any printer is now just one click away. No setup or printer-driver installation required.

File Sync: Easily synchronize files and folders between the host PC and client computer. Repeat recent folder syncs with a single click.

Quick Connect & Reconnect: Users can get into session faster with a one-click Desktop Shortcut and now receive notification before a session times out due to inactivity. They can also reconnect more easily after timing out.

Guest Invite: Guest Invite now includes more features for collaborating with a second person you invite to temporarily view or share control of your host PC (permission-based only).

Administrator & Reporting APIs: Use the new Administrator API to create, invite, modify and delete users through your existing provisioning system (LDAP, Active Directory). Use the Reporting API to integrate GoToMyPC Corporate reports and session data with your internal database. An optional “out-of-the-box” provisioning tool is also available.

Reporting Updates: The Reporting feature has 14 different reports IT Administrators can use to monitor users. Easily monitor license usage with the revised User Inventory Report. Run the new Connections Report to view connection details.

Shared Access: Enable multiple end users to access a single host PC with their own unique user names, passwords and access codes – ideal for servers or unattended remote administration. Please ask your account manager for more information.

Centralized RADIUS Deployment: Configure the RADIUS host PC directly through the Administration Center.

Access Activity Log: View recorded connection history, including file transfer, remote printing, WAN IP and more.

Best Practices Resource Center: The Best Practices Resource Center serves as a one-stop shop for providing helpful tips for getting the most out of GoToMyPC Corporate.

GoToMyPC Corporate 6.0 is easier to use and faster than ever before, making it an indispensable productivity tool for administrators and end users alike.

Find out more by test driving GoToMyPC Corporate 6.0 today.

Citrix Online, a division of Citrix Systems, Inc. (Nasdaq: CTXS), is a leading provider of easy-to-use, on-demand applications for remote desktop access, Web conferencing and collaboration.
