

FACT SHEET

Citrix® GoToMyPC® 6.0 Access Your PC from Anywhere™

Citrix® GoToMyPC® is the fast, easy, and secure Web-based service that gives you real-time access to your PC from any Web browser or wireless device. With GoToMyPC 6.0, Citrix Online is revolutionizing remote access again by providing the fastest remote access service that is more “like being there” than ever before.

GoToMyPC 6.0 improves your access experience through new features such as Remote Sound, Remote Printing and File Sync. It's also faster and easier to use, with improved features and performance that help you get more work done – without adding complexity. GoToMyPC makes remote access so seamless and easy that you can get your work done just as fast from any remote location – at home, while traveling or across town – as you could if you were actually at your office PC. You gain immediate access to your files, programs, email and network from virtually anywhere. When it comes to reliability, GoToMyPC is the best solution for everyday use.

NEW AND IMPROVED GoToMyPC 6.0 FEATURES

- **Remote Sound** Now you can hear your PC as well as see it! GoToMyPC allows you to hear any sound on your remote computer for a complete remote access experience. Use it to hear system sounds, voicemail or recordings, or to enjoy music from your host PC in full, high-quality audio from any Internet connection. It's not just an image anymore; it's really like being there.
- **Improved Remote Printing:** Printing from the host PC to any printer wherever you are is now just one click away – no printer setup required!
- **File Sync:** Easily synchronize files and folders between your host PC and remote computer during sessions.
- **Quick Connect and Reconnect:** Connect and reconnect faster than ever – perfect for working from home.
- **Enhanced Guest Invite:** Guest Invite now includes more features for collaborating with a second person you invite temporarily to view or share control of your host PC.
- **Improved Universal Viewer:** Access your PC from any Web browser on any operating system, including Microsoft® Windows®, Microsoft® Windows® CE, Macintosh®, Linux, Unix® or Solaris®.
- **Easy Wireless Access:** Compatible with Pocketview™ – Access your host PC from your Pocket PC, Microsoft® Windows® Mobile or Microsoft® Windows® CE wireless device.
- **Works with Vista™:** GoToMyPC 6.0 works with the latest operating systems and browsers, including Microsoft® Windows® Vista™ and Microsoft® Internet Explorer® 7.
- **Advanced GoToMyPC Corporate Administration:** New features make it easier for administrators to deploy and manage GoToMyPC Corporate using existing provisioning systems.

AWARD-WINNING LEADERSHIP IN REMOTE ACCESS TO THE DESKTOP

Through GoToMyPC 6.0, Citrix reaffirms its leadership as the fastest, easiest and most complete solution for secure remote access to the desktop. The award-winning GoToMyPC is a recent recipient of the LAPTOP Ultimate Choice Award, PC World Magazine's World Class Award, CNET's Editors' Choice Award, PC Magazine's Editors' Choice Award, Windows IT Pro Magazine's Readers' Choice Award and the SIIA Codie Award for Best Mobile Product.

THE CITRIX GoToMyPC PRODUCT SUITE

Citrix offers three versions of GoToMyPC to meet the needs of individual professionals, small and medium-sized businesses and large organizations:

- **Citrix GoToMyPC Personal:** GoToMyPC Personal is for individual users who want remote access to one or more PCs.
- **Citrix GoToMyPC Pro:** Designed for small business and teams (2-20 PCs), GoToMyPC Pro includes centralized billing and an Administration Center where managers can add, suspend and delete users and run usage reports. Small businesses and teams can roll out a secure remote-access solution in minutes.
- **Citrix GoToMyPC Corporate:** GoToMyPC Corporate allows small, medium-sized and large organizations to create and manage groups, generate a variety of reports and control usage and feature access. GoToMyPC Corporate enables administrators to establish password-enforcement rules and select additional security features such as third-party authentication. Organizations can roll a secure remote-access solution to an unlimited number of users quickly and cost-effectively.
